

Product Data Sheet

MET-3S Soft skills for Seafarers

MET-3S is a psychometric assessment, specifically developed for the maritime industry. The product offers insights into the “soft skills” of officers on board. Soft, “non-technical skills” of officers are increasingly important onboard, due to the

changing workforce and automation of many technical tasks.

This psychometric assessment is based on self-reported behaviours and attitudes.

Application	MET-3S is suitable to be used in selection, learning and development as well as the promotion of crews in combination with other tools such as personal interviews, work samples and technical assessments. Valid only for active officers
Versions	–
